

# INTRODUCTION TO ASTRONOMY I : PHYS 171

**Wednesday, Dec 1<sup>st</sup>, PSC 3046, 6:35pm – 7:35 pm**

*A presentation from our Service Learning students in PHYS 171  
They will present select topics of interest from this course  
and reflect upon their experiences in service learning.*

Some fun things that service learning and PHYS 171 provides:

- Hands-on learning to use a telescope
- Learn about the motion of the sun, moon and the stars
- Being able to tell your latitude and longitude from looking at celestial objects

*If you are interested in any aspect of Astronomy  
or are considering taking this course please  
feel free to join us to learn more by talking to our student  
presenters.*

**If it is a clear night please join us for an observation session at the  
observatory at Lanark (owned by the Harbour Sky Astronomy Club)**
